# LIGHTING CONTROLS FEATURES & BENEFITS

### Intensity and Dimming

Light output levels can be set according to the specification.

### **Daylight Harvesting**

Lights are dimmed to enable energy savings when daylight is available.

### Wall Panels

Manual control with DALI-2 and wireless battery-free wall panels.

### Personal Lighting Control

Space user can tune the light above the workstation using their mobile phone.

### Colour Temperature

Adjust colour temperature to have the desired atmosphere and mood.

### Out-of-the-box Operation

Lights start working the moment they are powered on and can be tuned later if necessary.

### Groups

Luminaires can be grouped together, and group member level can be selected to support energy savings and comfort.

### Corridor Hold

Keep lights on in a space while another space is in use for safety and comfort.

### **Presence Detection**

Lights are dimmed automatically based on the movement detections.

### **Automatic Lighting Control**

Lighting adapts automatically and continuously to the actual space usage.

### Scenes

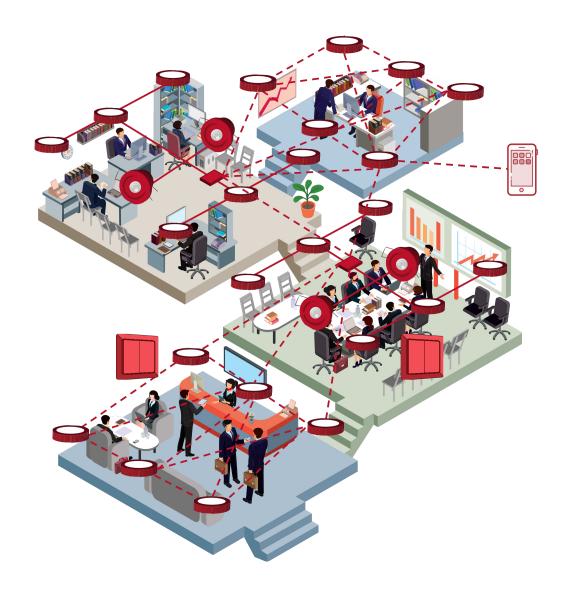

Predefined lighting scenes enable illumination based on lighting needs or situational requirements.

### **Absence Detection**

Lights are turned on manually and dimmed down automatically.

# **SOLUTION OVERVIEW**

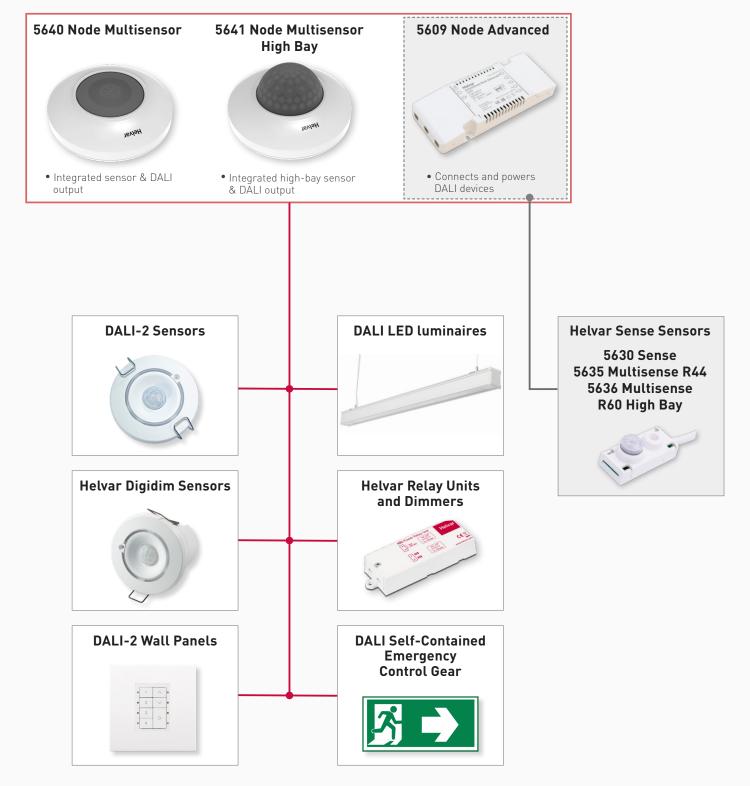

Nodes in the Helvar ActiveAhead system communicate wirelessly using Bluetooth Mesh technology. These Nodes can be built into luminaires offering a really simple installation. These Nodes can also connect standard DALI and DALI-2 devices; such as, luminaires, sensors and wall panels into the system. Different types of Nodes communicate seamlessly and can be chosen based on what best suits the space in question. This makes the ActiveAhead system easy and flexible to design, install and scale.

This document shows how different spaces can be implemented using ActiveAhead and standard DALI devices. When configuration is required, it is done with the easy-to-use ActiveAhead mobile app.

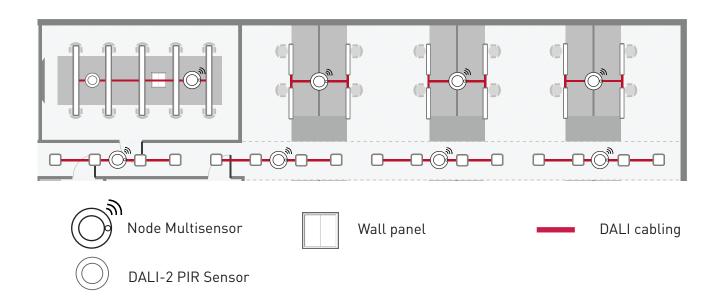

# CHOOSING PRODUCTS WITH INDEPENDENT NODES

With independent ActiveAhead Nodes, you are free to choose standard DALI luminaires for your installation. Add necessary DALI-2 sensors and DALI-2 or wireless wall panels as required and you are good to go. The system starts to work out-of-the-box and finetuning is done using the mobile app.

# 5640 - OVERALL VIEW OF AN OFFICE SPACE

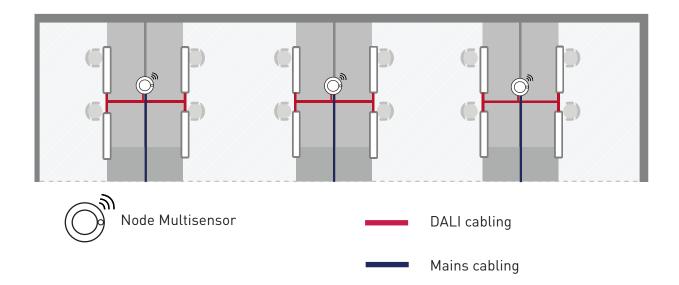

- Simple and fast to design, install and configure
- Cost efficient with great ROI
- Standard DALI luminaires and DALI-2 input devices

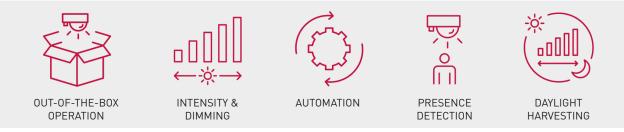

# 5640 - **OPEN PLAN**

- Out-of-the-box operation with presence detection and daylight savings
- Standard DALI luminaires
- Add grouping and corridor hold for additional comfort

5640 ActiveAhead Node Multisensor

# 5640 - CORRIDOR

- Out-of-the-box operation with presence detection and daylight savings
- Standard DALI luminaires
- Add grouping and corridor hold for additional comfort

Mains cabling

DETECTION

CORRIDOR HOLD

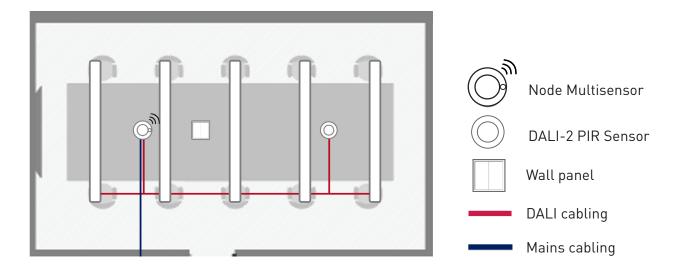

5640 ActiveAhead Node Multisensor

# 5640 - MEETING ROOM A

- Presence or absence detection and daylight savings
- Standard DALI luminaires
- Add group and wall panel for manual control
- Add corridor hold for additional comfort

**OPERATION** 

**INTENSITY &** DIMMING

**GROUPS** 

**SCENES** 

WALL PANELS

CORRIDOR HOLD

**ABSENCE** DETECTION

5640 ActiveAhead Node Multisensor

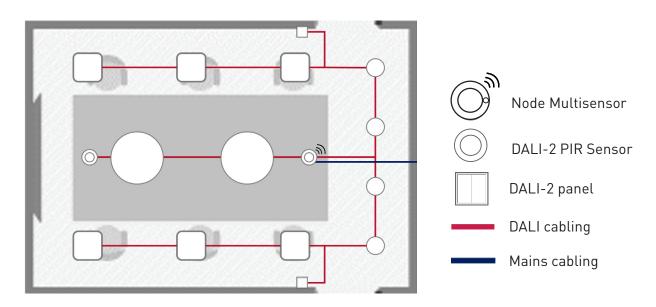

320D2 PIR Sensor (DALI-2)

185W Wireless Control Panel

# 5640 & DALI-2 PANELS - MEETING ROOM B

- Presence or absence detection and daylight savings
- Standard DALI luminaires
- Add DALI-2 panel for manual control
- Add corridor hold for additional comfort

# 5609 - **CLASSROOM**

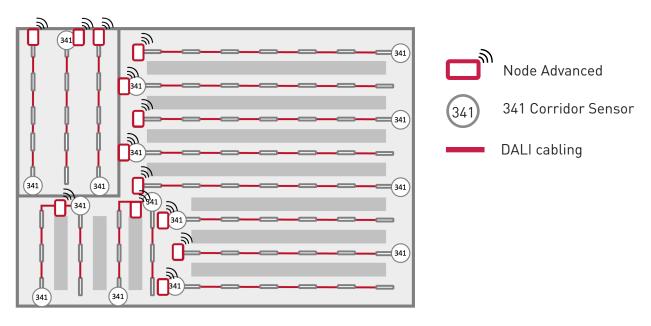

- Presence or absence detection and daylight savings
- Standard DALI luminaires
- Add group and wall panel for manual control
- Add corridor hold for additional comfort

# 5609 - GROCERY STORE

- Node Advanced powers and controls the DALI line
- Presence detection
- Add groups for comfort

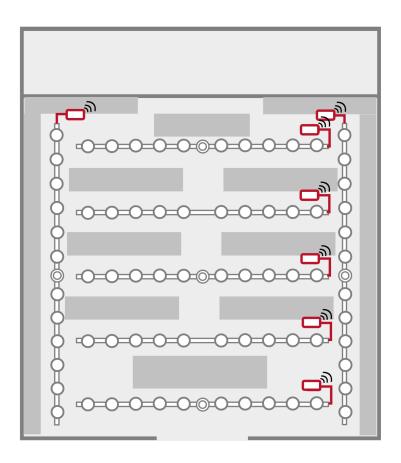

5609 ActiveAhead Node Advanced

341 Corridor sensor

# 5609 - **RETAIL**

- Node Advanced
- DALI-2 Track Sensor
- DALI cabling
- DALI lighting track
- Node Advanced powers and controls the DALI line on the track
- Presence detection
- Add groups for comfort

# **Helvar Products**
